PROJECTS

The Prometheus Conclave

2024

- Architected and deployed full-stack event management platform handling 8,000+ registrations with concurrent user traffic during peak periods
- Integrated Stripe payment gateway processing 5,000+ transactions worth INR 15L+, implementing webhook validation and automated reconciliation
- Developed affiliate tracking system managing 2,600+ affiliates with real-time analytics dashboard and commission calculation engine
- Built role-based access control system with JWT authentication supporting admin, volunteer, and participant user flows
- Optimized database queries and implemented Redis caching, reducing API response times by 60% during high-load scenarios

Zentha Notes

2024

- Built comprehensive student learning platform with notes repository, previous year questions, and resource sharing for 1,000+ active users
- Developed browser-based code editor with syntax highlighting supporting Python, JavaScript, and C++, using Monaco Editor
- Implemented student portfolio builder with customizable templates and public profile sharing functionality
- Created admin panel with content moderation, user analytics, and automated backup systems

EXPERIENCE

Web Developer

Dec 2024 – Present

Peppeble

Jaipur, Rajasthan

- Develop client-facing web applications using React and Next.js with focus on performance optimization and responsive design
- Build RESTful APIs with Node.js and Express.js, implementing proper error handling and request validation
- Collaborate with design team to translate Figma mockups into pixel-perfect, production-ready components

Web Development Intern

Jun 2023 – Nov 2024

Fluffwalks

Jaipur, Rajasthan

- Developed custom CRM system using React and Node.js to manage customer orders, user data, and business analytics
- Maintained company website and implemented performance improvements reducing page load times by 40%

Python Developer Intern

May 2023 – Jul 2023

InnoByte Services

Remote, India

- Built automated web scrapers using Python, BeautifulSoup, and Puppeteer to extract structured data from 50+ sources
- Implemented data validation pipelines and database insertion scripts with error handling and logging
